1) Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Calculations are based on actual data where possible and best estimates where actual data is not available. Both the TER and TC of the Fund are calculated on an annualised basis, however these cannot be determined accurately because the Fund was recently launched and has a short track record.

PORTFOLIO ATTRIBUTES

- The fund aims to produce long-term capital growth by investing in equities listed in emerging markets.
